

Environmental Objectives

- ❑ Ensure all applicable legal & other requirements to which the company subscribes related to its environmental aspects are fully complied with;
- ❑ Ensure any relevant statutory and clients' environmental requirements are fully complied with in our day-to-day operation activities;
- ❑ Consider energy efficiency, sustainability, durability and other environmental objectives in the design process, sales & marketing, green purchasing, administration, production and warehouse, based on available technology and materials;
- ❑ Specify packaging materials and methods where their physical properties are routinely considered from an environmentally sustainable perspective wherever practicable and affordable;
- ❑ Prevent pollution and mitigate adverse consequences; and
- ❑ Conserve energy, reduce consumption and minimise waste.

Ensure all identified significant and adverse project environmental impacts are remedied to acceptable levels (as determined by the Management Representative).
